Professional Summary

Full-Stack Developer with 4 years building production web applications end-to-end — React/Next.js/TypeScript front-ends backed by Node.js and FastAPI services. Shipped platforms serving 10K+ users with strong frontend performance (95+ Lighthouse, ~30% faster loads) plus backend/API work across REST design, PostgreSQL/Supabase, Docker, and OpenAI-powered LLM features. Comfortable across the stack, focused on scalable architecture and reliable CI/CD.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend	React.js, Next.js (App Router, SSR/SSG/ISR), Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, Material UI
Backend	Node.js, FastAPI, REST API Design, Authentication (JWT), WebSockets
AI & Data	OpenAI API, Prompt Engineering, LLM Prompt Chaining, PostgreSQL, Supabase
DevOps	Docker, Git, GitHub Actions, CI/CD, Vercel, Netlify
Testing & Practices	, React Testing Library, Playwright, Component-Driven Development, Performance Optimization, Scalable Architecture, Agile/Scrum

Professional Experience

Full Stack Developer

Feb 2023 – Present

MindRind — Lahore, Pakistan

- Developed and maintained 15+ production-ready features and modules using React, Next.js, TypeScript, Node.js, FastAPI, and Supabase, serving over 10K monthly active users across multiple web applications.
- Built end-to-end solutions by creating intuitive frontend experiences and scalable backend services, including REST APIs, authentication systems, and real-time functionality.
- Improved application performance by optimizing state management with Redux Toolkit, refining API interactions, and implementing caching strategies, resulting in faster load times and reduced server requests.
- Created responsive, user-friendly interfaces with Tailwind CSS and Material UI, ensuring a consistent experience across devices while maintaining high accessibility and performance standards.
- Used Docker to simplify development and deployment processes, making it easier for teams to work in consistent environments and reducing setup issues.
- Automated build, testing, and deployment workflows with GitHub Actions, helping accelerate releases and improve overall development efficiency.
- Implemented secure authentication, authorization, and database solutions with Supabase, contributing to reliable and scalable application architectures.
- Participated in Agile development cycles, conducting code reviews, collaborating on sprint planning, and delivering features on schedule while maintaining code quality.
- Worked closely with designers, product managers, and fellow developers to turn business requirements into practical solutions and continuously improve the user experience.

Associate Software Engineer

Aug 2022 – Jan 2023

Technoventures — Lahore, Pakistan

- Built responsive web interfaces with HTML5, CSS3, and JavaScript.
- Developed reusable, scalable React components, improving UI consistency and development efficiency.
- Improved website performance, mobile responsiveness, and SEO to enhance user experience and increase site efficiency.
- Maintained and updated existing websites by resolving bugs, implementing new features, and ensuring reliable functionality.
- Worked with backend developer for the integration of Rest-Apis in Frontend.
- Used Native and third party libraries for state management throughout the project.

Projects

AI Nutritionist

- AI-driven nutritionist app that generates personalized weekly diet plans from fitness goals, dietary restrictions, and activity level.
- Built a RESTful FastAPI backend handling user profiles and LLM prompt chaining for structured meal-plan generation, with a Next.js/TypeScript front-end.
- **Stack:** FastAPI, OpenAI API, Prompt Engineering, Next.js, TypeScript, Tailwind CSS

AI House Visualizer

- AI-based platform that lets users restyle house-exterior components from an uploaded photo.
- Implemented SSR and polygon-driven dynamic SVG for an interactive, real-time editing experience.
- **Stack:** Next.js (App Router), TypeScript, Tailwind CSS, Redux Toolkit, Node.js, Docker, Supabase

AI Assistant Platform

- AI assistant dashboard supporting chat and voice interaction, with scalable Redux Toolkit state management for real-time AI interactions.

- **Stack:** React, Next.js, Redux Toolkit

MyExpertPal

- Scalable learning platform with interactive dashboards and leaderboards, built on an optimized component architecture for performance and maintainability.
- **Stack:** React, Next.js, TypeScript, Node.js

Education

BS Computer Science
Bahria University, Lahore

2018 – 2022
