

Mirza Touheed Ali Baig

Lahore, Pakistan — +92 336-879-0308 — mirzatouheed27@gmail.com — LinkedIn — GitHub

SUMMARY

Front-End Engineer with 3+ years of experience building scalable web applications using React, Next.js (SSR, SSG, ISR, App Router), and TypeScript. Experienced in delivering high-performance production platforms used by 10K+ users, with strong expertise in component architecture, performance optimization, state management (Redux Toolkit, Zustand, React Query), and CI/CD automation. Skilled in REST API integration and backend collaboration, designer-to-code handoff, and accelerating development velocity using AI tools such as GitHub Copilot and Cursor. Proven ability to collaborate with product managers, designers, and backend teams to deliver user-focused, scalable solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks / Libraries: React.js, Next.js (App Router, SSR, SSG, ISR), Redux Toolkit, Zustand, React Query

UI & Styling: Tailwind CSS, Material UI, Bootstrap

API & Backend Collaboration: REST API Integration, GraphQL (familiar), API design review, cross-team backend coordination

AI-Assisted Development: GitHub Copilot, Cursor — for accelerated, optimized code delivery

Tools & Platforms: Git, GitHub, GitHub Actions, CI/CD Pipelines, Vercel, Netlify

Core Skills: Performance Optimization, Scalable Frontend Architecture, Agile/Scrum, Designer Collaboration, Code Review

PROFESSIONAL EXPERIENCE

Frontend Developer

Feb 2023 – Present

MindRind

Lahore, Pakistan

- Designed and delivered 15+ production-ready modules using React, Next.js (App Router, SSR/SSG/ISR), and TypeScript, serving 10K+ monthly active users.
- Reduced API overhead by 40% and improved page load times by 30% through optimized REST API integration, efficient data-fetching strategies using React Query, and server-side rendering.
- Achieved 95+ Lighthouse performance scores by leveraging SSG/ISR rendering strategies, optimizing component rendering, and improving Core Web Vitals.
- Designed and implemented CI/CD pipelines using GitHub Actions, reducing deployment time by 60% and improving release reliability and rollback safety.
- Collaborated closely with backend engineers to define REST API contracts and data schemas, ensuring seamless frontend-backend integration across all modules.
- Partnered with UI/UX designers during design handoff using Figma, translating wireframes and design systems into pixel-perfect, accessible components.
- Accelerated feature delivery by integrating AI-assisted development tools (GitHub Copilot, Cursor), reducing boilerplate authoring time and improving code consistency.
- Managed scalable client-side state using Redux Toolkit and Zustand, and server state with React Query, enabling real-time data synchronization across complex dashboard views.
- Participated in Agile/Scrum ceremonies including sprint planning, daily stand-ups, code reviews, and retrospectives within cross-functional product teams.

Frontend Development Intern

Sep 2022 – Jan 2023

Technovenctures

Lahore, Pakistan

- Built responsive web interfaces using HTML5, CSS3, and JavaScript, collaborating with designers to implement accurate UI from Figma mockups.
- Developed reusable and scalable React components, improving UI consistency and reducing development time across shared design patterns.
- Integrated REST APIs into frontend components and assisted senior developers in frontend performance improvements and bug triage.

PROJECTS

MyExpertPal

React, Next.js (App Router, SSG/ISR), TypeScript

- Built a scalable learning platform with interactive dashboards and leaderboard functionality using Next.js App Router with ISR for performance-optimized content delivery.
- Implemented REST API integration with backend services, managed server state via React Query, and coordinated with backend team on API contract design.

- Optimized component architecture and applied SSG for static content routes, improving application performance, Lighthouse scores, and maintainability.

AI Assistant Platform

React, Next.js, Redux Toolkit, Zustand

- Developed an AI assistant dashboard supporting real-time chat and voice interaction with SSR-powered initial loads for fast perceived performance.
- Implemented scalable hybrid state management: Redux Toolkit for global application state and Zustand for lightweight, localized UI state in real-time AI interactions.
- Leveraged GitHub Copilot and Cursor throughout development to accelerate feature implementation and maintain consistent, optimized code patterns.

ENGINEERING PRACTICES

- | | |
|--|--|
| • Component-driven development | • Performance optimization and Lighthouse auditing |
| • SSR, SSG, and ISR rendering strategies | • AI-assisted development (Copilot, Cursor) |
| • REST API integration and backend collaboration | • CI/CD automation and deployment pipelines |
| • Designer collaboration and Figma handoff | • Agile/Scrum workflows and code review |

EDUCATION

Bachelor of Science in Computer Science

Bahria University

2018 – 2022

Lahore, Pakistan
